

Planetaire Mono

B612 letterforms · Hack infrastructure · Nerd Font
icons

Version 1.0.0

Planetaire Mono is a composite monospace font that merges the highly legible letterforms of B612 – a typeface designed by Intactile Design for use in Airbus cockpit displays – with Hack Nerd Font’s complete infrastructure: punctuation, symbols, and 12,000+ developer icons.

The result is a font optimized for terminal and editor use that combines aviation-grade character clarity with full programming language coverage. The name is a nod to asteroid B-612 from *The Little Prince*.

Text Showcase

Planetaire Mono at various sizes, showing B612's distinctive letterforms optimized for readability at small sizes and on low-resolution displays.

The quick brown fox jumps over the lazy dog. Pack my box with five dozen liquor jugs. How vexingly quick daft zebras jump!

In the great void between stars, instruments must be read without error. Every glyph must be unambiguous: the digit 0 distinct from the letter O, the numeral 1 clearly not a lowercase l or uppercase I. B612 was born from this requirement – originally designed for cockpit displays at Airbus, where a misread character could mean the difference between FL350 and FL850. Planetaire Mono inherits that precision and pairs it with the full symbol coverage a programmer needs: braces, brackets, pipes, arrows, and 12,000 icons ready for a modern terminal.

FRENCH • GERMAN • SPANISH • TURKISH

Les naïfs ægithales hâtifs pondsjflam au zéphyr joyeux. Falsches Üben von Xylophonmusik quält jeden größeren Zwerg. El veloz murciélago hindú comía feliz cardillo y kiwi. Pijamalı hasta yağız şoföre çabucak güvendi.

GREEK

Ξεσκεπάζω τήν ψυχοφθόρα βδελυγμία. Θlongest ελληνική πρόταση που χρησιμοποιεί όλα τα γράμματα.

CYRILLIC

Съешь же ещё этих мягких французских булок, да выпей чаю. Широкая электрификация южных губерний даст мощный толчок подъёму сельского хозяйства.

Code Sample

Syntax highlighting uses the Kerm terminal color palette.

```
def analyze_trajectory(altitude: float, velocity: float) -> dict:
    """Calculate orbital parameters."""

    G = 6.674e-11 # gravitational constant
    M = 5.972e24

    if altitude > 400_000:
        orbit_type = "LEO"
    elif altitude > 35_786_000:
        orbit_type = "GEO"

    period = 2 * math.pi * math.sqrt(altitude**3 / (G * M))

    return {"type": orbit_type, "period": period, "v": velocity}
```

```
use std::collections::HashMap;

fn fibonacci(n: u64) -> u64 {
    match n {
        0 => 0,
        1 => 1,
        _ => fibonacci(n - 1) + fibonacci(n - 2),
    }
}

fn main() {
    let values: Vec<u64> = (0..20).map(fibonacci).collect();
    println!("Fibonacci: {:?}", values);
}
```

Source Fonts

B612 Mono	Designed by Intactile Design for Airbus. Optimized for legibility in cockpit displays. Planetaire Mono takes its letters (A-Z, a-z), digits 1-9, and extended Latin/Greek/Cyrillic glyphs from B612.
Hack	Chris Simpkins' typeface designed for source code. Provides the base font structure: punctuation, symbols, digit 0, and overall metrics.
Nerd Fonts	Ryan McIntyre's icon patching project. 12,000+ developer icons including Powerline, Font Awesome, Devicons, Material Design, and more – all included via the Hack Nerd Font base.

Build Pipeline

Planetaire Mono is built with a custom Python pipeline using fontTools. For each weight variant, the pipeline loads Hack Nerd Font as the base, merges B612 letter glyphs by Unicode range, renames the result, and applies post-processing fixes. ExtraBold weights are generated from Bold via FontForge emboldening.

License

Planetaire Mono is released under the **SIL Open Font License 1.1 (OFL-1.1)**.

The OFL allows free use, modification, and redistribution of the font, including in commercial products, provided that modified versions are not sold by themselves and carry a different name.

The constituent fonts carry the following licenses:

- **B612 Mono**: SIL Open Font License 1.1 + Eclipse Public License 2.0
